Topic Covered: Note any resolutions and/or additional Actions Required on this Form.		
<Mr. Larenbaum ((202) 663-8754) called with a question regarding the proposed TSCA test rule for hazardous air pollutants. He wanted to know whether a company that produces a complex stream or combination of chemical substances, one of which is a hazardous air pollutant subject to the test rule, would be subject to the rule. He indicated that the complex stream in his client's case is a class 2 chemical substance that is listed on the Inventory. I told him that the Agency is in the process of reviewing comments on the test rule, and I requested that he submit his comment in writing via fax.>		
KEY WORDS: < hazardous, air pollutants, class 2 chemical substance >
